PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience building web and mobile applications. Works across Angular, TypeScript, Node.js, NestJS and Ionic, with experience in real-time messaging, business systems and cloud deployment. Owns features from requirements through release and production support, and mentors developers through implementation and code review.

PROFESSIONAL EXPERIENCE

PULSE Innovations GmbH

Jul 2025 – Present

Senior Software Engineer

- Build Angular and Ionic applications for web, mobile, smart boards and touch-screen panels, sharing product features across platforms.
- Integrate AI functionality and prediction-based features into applications to support automation and data-driven workflows.
- Work with product and engineering teams to define requirements and deliver features through implementation, testing, release and post-release improvements.

The Right Software | Islamabad, Pakistan

Jun 2024 – Jun 2025

Software Engineer

- Developed Angular and PrimeNG web applications and Ionic mobile applications, working directly with clients to translate requirements into product features.
- Built features for a SaaS chat platform with NestJS, Socket.IO and WebSockets, including multi-persona messaging, end-to-end encryption, unread tracking and conversation controls.
- Designed and migrated Firebase Cloud Functions and maintained real-time data in Firestore; integrated Stripe payments and Firebase Cloud Messaging notifications.
- Implemented timezone-aware reminders for users in Sweden and other regions, and contributed to vector search exploration.
- Wrote Jasmine and Karma unit tests and mentored 3 junior developers within a 15–20 person engineering team.

MM Pakistan (Pvt.) Limited | Lahore, Pakistan

Jan 2022 – May 2024

Senior Full Stack Developer, May 2023 – May 2024

Full Stack Developer, Jan 2022 – Apr 2023

- Led development of a company-wide CRM and built automated invoicing and real-time vehicle tracking systems for internal business operations.
- Delivered full-stack applications with Angular, React, Node.js, Express, TypeScript, MongoDB and SQL; developed REST APIs and GraphQL integrations.
- Automated operational workflows using Google Workspace APIs and Google Apps Script; deployed and maintained applications on Google Cloud, Heroku and company servers.

Chiltan Pure Pakistan | Lahore, Pakistan

Jun 2023 – Sep 2023

Senior Angular Developer

- Developed Angular applications with email generation, third-party API integrations and user data imports; guided junior developers on implementation and code quality.

Relygents | Remote

Oct 2021 – Feb 2022

Full Stack Developer

- Led a team of 4 developers delivering web applications, from requirements and planning through implementation and testing; reviewed code and implemented security updates.

ADDITIONAL EXPERIENCE

MediaCowBoys | Lahore, Pakistan

Jan 2021 – Jan 2022

Web Developer

- Built and maintained MEAN/MERN applications, worked with product managers and designers, and resolved application defects within an Agile team.

ScriptOne | Lahore, Pakistan

Dec 2019 – Jan 2022

Web Developer — Developed responsive web interfaces for use across devices.

SELECTED PROJECTS

BD OTO | Business Development Automation

Automated prospect tracking, reporting and configurable notifications to keep stakeholders across regions informed of business development activity.

Integrated AI automation workflows into business development processes to streamline routine tasks and support reporting.

AI Playground | AI-Assisted Proposal Development

Built an AI-powered workspace for creating high-level business proposals, helping users turn requirements into structured drafts for review and refinement.

Vehicle Management System | Ride-Hailing & Predictive Analytics

Developed a vehicle management platform with ride-hailing workflows and operational reporting. Integrated AI-based repair-cost predictions to identify vehicles likely to require higher maintenance spending relative to their current value, supporting repair prioritization and budget planning.

CAU | Financial Operations

Centralized financial workflows to support accounting, reporting, budgeting and forecasting, with automation of manual tasks.

Skillstitute | E-Learning

Delivered course-based learning with integrated quizzes so users could assess their knowledge within learning modules.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, PHP

Frontend & Mobile: Angular, React, Ionic, PrimeNG, Bootstrap

Backend & APIs: Node.js, NestJS, Express, REST APIs, GraphQL, Socket.IO, WebSockets

Databases: MongoDB, PostgreSQL, MySQL, Firestore

Cloud & Delivery: Google Cloud Platform (GCP), Firebase Cloud Functions, Kubernetes, Heroku, Vercel, Git, GitHub, Bitbucket

Testing & Integrations: Jasmine, Karma, Stripe, Firebase Cloud Messaging, Google Workspace APIs, Google Apps Script

Engineering: SaaS applications, real-time systems, Agile delivery, code reviews, developer mentoring

EDUCATION

The Islamia University of Bahawalpur | Pakistan

2017 – 2019

Master's Degree in Computer Science

The Islamia University of Bahawalpur | Pakistan

2015 – 2017

Bachelor's Degree in Computer Science

CERTIFICATIONS & TRAINING

GCP Associate Cloud Engineer; Full Stack Development; Introduction to Cloud Computing; Introduction to DevOps
